REST APIs
SQL
C++/C#
Git

LANGUAGES

Ukrainian - Native
Russian - Native
English - Pre-Intermediate

I'm an enthusiastic and detail-oriented Frontend Developer seeking an entry-level position with company to use my skills in coding. While studying at school, I began to study html/css, at that moment I got my first commercial layout project. In the course of studying at the university, all development was introduced in C++ / C# / MySQL, but at some point, I realized that Web development attracts me more. After that, I started learning html/css/js from the very beginning, getting to the point of using this development stack confidently, I started expanding my skills and learning React.js

EXPERIENCE

LANDING SHOP

Creator

- Built a responsive web site using HTML, CSS, JS, PHP, MySQL
- An access policy was implemented: guests see - the company's information page, Users - see the functionality of the store (Add to cart, cart, checkout), Administrators - have access to textolite

WEATHER APP

Creator

- Built a responsive web app using ReactJS
- Utilized the openweather API
- The functionality is primitive, you enter the locality in the search string, after selecting, information about the weather at the current time is displayed (Temperature, humidity, wind speed)

NOTESAPP

Creator

- Built a responsive web app using ReactJS
- Applications like "Notes", you can add a new card in different colors (5 colors) and leave a note
- The note displays: the note text, the date and time of the last edit, and the trash can icon for deleting the note
- Everything is stored in Local Storage

COUNTRYAPP

Creator

- Built a responsive web app using React
- Utilized the restcountries API
- Implemented: sorting, searching, displaying additional information about the country when switching to the card
